Health, Safety and Welfare Policy

Statement of Intent

This Health, Safety and Welfare Policy statement and the following full policy was approved by the Governing Body on the date below and shows the expected standards and commitment to health, safety and welfare required throughout the whole of Ipswich School.

The Governors of the School accept these duties and it will continue to be their policy to promote standards of health, safety and welfare. They will comply fully with the terms and requirements of the Health and Safety at Work etc Act 1974. Regulations made under the Act and approved codes of practice, showing regard to the DfE Guidance *Health and Safety: Responsibilities and Powers*. It is considered by the Governors of the School that health and safety is a responsibility at least equal in importance to that of any other function of the School.

Whilst a statutory duty exists to comply with the Health and Safety at Work etc Act 1974 and all subsequent and relevant legislation and regulations pertaining thereto, this shall be regarded as the minimum standard expected.

The Headmaster and Head of the Preparatory School have ultimate responsibility for ensuring the implementation of this policy within their respective areas. However, health, safety and welfare are the responsibility of all employees and as such all Ipswich School employees have an important part to play in the successful implementation of this policy.

Every line manager is responsible for implementing the policy in his or her area of activity. Every employee must comply with the policy and co-operate with colleagues to achieve high standards of health and safety.

Responsibilities of employees are outlined in the main policy document.

This Policy is required under the Health and Safety at Work etc Act 1974. Employees are reminded that they have duties under the act, and regulations made under it and a breach of these duties could lead to prosecution of the Governors as the employers or of individual employees. Failure to comply with safety requirements could also lead to disciplinary action.
